

SA German Chamber of Commerce & Industry Water Delegation 20 - 24 August 2012

BFW Jachelutta GmbH

Delegate	Roland de Craigher
Position	Managing Director
Service Offerings	Equipment to aid in waste water treatment and drinking water sterilisation
Profile	<p>The products offered by JFW Jachuletta offer sustainable solutions for obstacles found within the sterilisation of water and treatment of waste water value chain. Their products guarantee unparalleled results, in addition to providing economic profitability over the long term.</p> <p>The unique feature is as a result of creative platform technology, based on the combination of an ultraviolet irradiation and ultrasonic cavitation system. The result is the complete termination of germs and other microorganisms.</p>

Geotec Rohstoffe GmbH

Delegate	Esther Pusch
Position	Project Manager South Africa
Service Offerings	Offers integrated consultancy services and customer support in the fields of mining, environmental, structural and civil engineering
Profile	Offers integrated consultancy services and customer support in the fields of mining, environmental, structural and civil engineering. Due to years of experience and strong relationships to research institutions, universities and tried-and-trusted partners, our specialists and experts provide sustainable cost-effective solutions.
Website	www.geotec-rohstoffe.de

HPC AG

Delegate	Dirk Münstermann
Position	Head of Department
Service Offerings	Consulting services for water supply, water conservation, water planning, Integrated Water Resources Management and River Basin Management Consulting services for environmental, contaminated land, building demolition, mining, decommissioning, geotechnical engineering, due diligence
Profile	HPC offers consulting services on problematic environmental matters, related to water supply and conservation of water resources. This includes remedies for polluted or contaminated soil, other surfaces or disused hazardous sites. Project specifics include infrastructure planning and environmental consulting for water supply, as well as urban, landscape and civil engineering planning
Website	www.hpc.ag

MÖRK Bau GmbH & Co.KG

Delegate	Bastian Hagenlacher Erik Thamm
Position	Regional Business Development Managers, South Africa
Service Offerings	Desalination plant for a sustainable, decentralised water supply for remote areas, using renewable energy. The plants are decentralized (there where the water is required), self-sufficient (independent of mains electricity), inexpensive (in terms of both procurement and running costs), local (local resources are involved) and secure (increased anti-thief protection and shutter holdback)
Profile	Mörk Water Solutions is an SME, forming part of a construction company, with the aim of providing innovative and sustainable solutions in the field of drinking water. With over 30 years in experience, the firm recently extended their service offer to environmental matters. In addition to being active in the photovoltaic industry, they aim to help remote areas integrate with their local environment with small and sustainable desalination plants while making use of renewable energy

Partnership

SEBA Hydrometrie GmbH & Co. KG

Delegate	Rudolf Düster
Position	Managing Director
Service Offerings	Measuring instruments and systems for hydrology
Profile	An internationally active company, with more than 40 years' experience in the manufacture of modern, up-to date, measuring and control instruments for hydrology, meteorology and water quality purposes. Seba executes only the highest standards of quality, precision, reliability and longevity to their components and sensors, additionally put through a rigorous series of tests and various trials. These modern, highly-developed evaluation procedures offer almost infinite transparency for any physical environment. However, The modern processes provide almost unlimited visibility for the physical environment. It is however recognised that the systems are only as accurate as the device that determines the measured values in the field allows. Hence, they accept the challenge and create systems that allow for this evaluation
